

Lipo-Flow

Support for Healthy Fat Metabolism*

Lipo-Flow Supplementation

Lipo-Flow helps support healthy fat metabolism through its specialized blend of lipotropic compounds, including inositol and methionine.* These compounds support the breakdown of fat to promote healthy fat metabolism by the liver, the removal of metabolic waste, and the absorption of fats by maintaining healthy bile levels.* Without lipotropic compounds, fat and bile can become trapped in the liver, impacting proper metabolism.*^{1,2}

The ingredients in Lipo-Flow are dosed in a manner that is congruous with what research suggests to be effective and safe, particularly for supporting healthy fat metabolism.*

Clinical evidence and research cited herein show that the ingredients in Lipo-Flow may:

- Support healthy fat metabolism*
- Promote healthy liver function*
- Promote healthy bile processes*
- Promote cellular efficiency*
- Support cell membrane integrity*

How Lipo-Flow Works

Methionine is an essential amino acid needed to produce choline, and it supports taurine synthesis, another amino acid involved in healthy fat metabolism.*^{2,3}

Lipo-Flow provides choleric and cholagogue gastrointestinal agents.* Choleric agents increase the volume of bile produced by the liver to absorb dietary fats in the small intestine. Cholagogue agents promote the healthy flow of bile from the liver and gall bladder into the intestines and, eventually, the bowel for excretion from the body.*

The formula is complemented with several flavonoids to promote healthy cell-signaling and further support fat metabolism.*⁴⁻⁸ Artichoke extract and beetroot powder have choleric and cholagogue properties. Dandelion root extract, tangerine extract, and gentian extract have cholagogue properties. All support healthy lipid oxidation and promote healthy inflammatory markers that positively impact fat accumulation in the liver.*⁴⁻⁸

Supplement Facts

Serving Size: 2 Tablets

Servings Per Container: 90

	Amount Per Serving	%DV
Artichoke Extract (aerial parts; <i>Cynara scolymus</i>)	400 mg	*
Dandelion Extract (root; <i>Taraxacum sp</i>)	250 mg	*
Beet Powder (root; <i>Beta vulgaris</i>)	200 mg	*
Inositol	150 mg	*
Tangerine Extract (peel; <i>Citrus reticulata</i>)	100 mg	*
Gentian Extract (root; <i>Gentiana scabra</i>)	100 mg	*
Taurine	100 mg	*
L-Methionine	100 mg	*

Other Ingredients: Dicalcium phosphate, microcrystalline cellulose, vegetable stearic acid, croscarmellose sodium, hypromellose, vegetable magnesium stearate, silica, Nutrapure™ certified organic coating.

Directions: Take two tablets with a meal three times daily or as directed by your healthcare practitioner.

Caution: If you are pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.
